Finality Withdrawn

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Applicant's arguments with respect to claims 32,36,37, 39,44, and 45 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

Claim 40 is objected to because of the following informalities: The recitation "further comprising a silicon source reagent" is not clear because if the reagent of claim 39 is a silicon precursor, then it seems claim 40 is restating that the composition is a composition that comprises a silicon source reagent. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32, 36, 37, 39, 44 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Muroyama, et al. (US 5,578,530).

Muroyama, et al disclose a precursor with formula (I) in which M is Si and in which R1 and R2 are the same methyl or other alkyl and X is F (col. 4, lines 10-20; col. 5, lines 30-56), and b is 2. It can be seen that ethyl is included in the disclosure that R is an alkyl group, as ethyl is an alkyl group.

Allowable Subject Matter

Claims 33-35, 38, 41-43 and 46-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
